|------------------|---|---------|
| TITLE | Marine bioluminescence, a global view. | |
| CHAIRMANS | Jérôme Mallefet | Belgium |
| ABSTRACT | From organisms to genes, from the surface to the deepest part of the ocean, from coastal to open sea, from ecology to morphology, behaviour, physiology, biochemistry, for genomes to transcriptomes, all aspects of marine bioluminescence are welcome. According to the number of participants we will have one half day session. | |
| KEYWORDS | Biodiversity, evolution, physiology, transcriptomic | |
