

**SESSION  
BL 8**

<b>TITLE</b>	<b>Bioluminescence in education</b>		
<b>CHAIRMANS</b>	1	Anthony Campbell	UK
	2	Valentina A. Kratasyuk	Russia
<b>ABSTRACT</b>	<p>Bioluminescence is a great way to excite scientific curiosity in young minds and demonstrations of living light are not difficult. In addition, the widespread use of novel bioluminescent technologies and tools involves the promotion of major scientific results in bioluminescence for the purpose of new applications. Because bioluminescence detections are rapid and simple it can be used to various innovative applications in education from high schools to universities. The session is expected to share experience in using new educational approaches, lecture and practical courses, new curricula and textbooks.</p>		
<b>KEYWORDS</b>	Education, bioluminescence, lecture and practical courses
